LANDSCAPE DESIGN IMAGING SOFTWARE

GreenScapes

GreenScapes makes it incredibly easy for the Professional Landscaper to design an entire landscape quickly. Landscape Design Imaging Software **GreenScapes** and **GreenScapes Night-Lighting** helps landscapers show clients what they have a hard time visualizing when designing landscaping or hardscapes. GreenScapes solves the problem for landscape contractors of "I just can't picture it!"

**NIGHT-LIGHTING
INCLUDED**

'Seeing is believing'; just take a digital photo on your first visit with a potential customer, download to your **GreenScapes Landscape Design Imaging Program** and within minutes, show them your landscape design concept. The customer doesn't always know what landscaping they want, but, they know what landscaping they like when you can show it to them.

Landscapers love GreenScapes

Hi Michele,

Thank you again for helping me as I just went through the steps you outlined and the program is now officially 'Registered'.

I sincerely recommend you and your firm as you were especially great in delivering, explaining and guiding me through the essentials of the program. The main 'Guts' of the program is so easy to understand compared to other software packages that I was contemplating to buy. The 'GreenScapes' software makes things simple, fast and fun. I compare it to the learning process I went through with the new 'Smart Phones' when they came out. All that is needed after the tutorial, is to explore and things link up so easily because your program respects keeping things simple.

Again, we appreciate all that you and your firm have done. I am ready to face a new season with a great new Landscape Design tool "GreenScapes" that will help people visualize quicker and come to a buying decision faster.

Have a great day Michele and will be in touch,

Sincerely, Rick Grant Landscape Design Director

"The program really helps in selling your job and making you look professional as a contractor. Customers really like the fact that can see what the project may look like before spending all their money! Thanks for a great product." Ryan

We just purchased and use [GreenScapes](#). Absolutely love it. It is super easy to use, we had tried using other landscape and pool design products previously, but they're difficult to use without spending a lot of time and training, and to our customer's weren't realistic enough. With GreenScapes Landscape Design you take a picture of the customer's house, be it the backyard, front yard, etc & there are libraries with lots of products you insert into the picture and create masterpieces with the customer's actual yard/house. The price of [\\$500.00](#) was great, there are [tutorial videos](#) specific to the different functions if you need help, or you can call the support staff. We are a Pool Installation company and find it very helpful and easy to use, especially for the great price & the customer's love how realistic it is and being able to use an ACTUAL picture of their yard. GreenScapes is Definitely recommend as a 10. Wonderful product by [Landscape Design Imaging Software](#).
Justina Richardet American Swimming Pools MO.

Michele,

I have to tell you I have been using an imaging program (former program DesignWare) for at least 15 years. It has taken away the guess work for my clients in what they are getting. With a render drawing they never understand what I was trying to create for them. I am so happy with GreenScapes. With GreenScapes I never have a customer surprised. The GreenScapes program allows my clients to see what they get, it's that simple. With drawings I had many conflicts with the client not understanding what I was trying to achieve. Often the customer is left in the dark with many unexpected surprises. GreenScapes makes my job so much easier working with the client. I usually take the clients ideas and implement them in GreenScapes. Then I go back to review with them and show them the results of a design and make the necessary changes if need be. I have been designing all my life and have awards in both the Boston and RI Flower Shows. I will continue to use GreenScapes program because it is a great time saver compared to other methods. Edits are so easy you never have to start from the beginning as with scale drawings. I can't say enough great things about the GreenScapes program. Thanks so much for all your help with updates. You're always a great help to me.

Denis R. PA Lawn and Landscape Contractor

"Closed more jobs in the last three weeks than I did last summer. Unbelievable." **Andy**

"Immediately after purchasing the software I gave it to one of my sales guys. He watched the training movies and quickly learned how to use the basics of the software. He took it out on his laptop to a bid that same day where he closed a \$30,000 Job! The best part is the customer had already gotten another bid from a different contractor but with the Imaging Software she decided to go with us. Thank you SO much! The program paid for itself in the same day!" **Carlos**

"The program is more than fantastic. I have got to pinch myself to believe that we were fortunate enough to stumble on your website. Thanks again I have been signing up multiple sales since I started using the software." **Will**
